## **PLANS FOR POST-CLOSURE LAND USE**

## APPENDIX 9

### PLAN FOR POST-CLOSURE LAND USE

The current plan for post-closure land use of the Pigeon Point Landfill is open green space. The landfill cap has been designed and developed to provide a natural vegetative cover that includes grasses and trees that will provide a natural sustainable ecosystem.

There will always be the possibility of other potential uses for the site in the future depending upon the needs of the City of Wilmington and/or The Diamond State Port Corporation. When such a potential use is defined, DNREC will be provided all of the required information at that time.
